Comprehensive Healthcare Simulation: ECMO Simulation Lindsay C. Johnston, Lillian Su, 2020-12-16 This book focuses on the technical cognitive and behavioral skills needed to implement an extracorporeal membrane oxygenation ECMO simulation program. It describes these programs on the individual team and hospital system level and includes the history of ECMO simulation, its evolution to its current state and future directions of technology and science related to ECMO simulation. Divided into six sections, chapters describe both the theoretical as well as the practical aspects of ECMO simulation, including a pictorial guide to setting up an ECMO simulation circuit and how to recreate ECMO emergencies. It is a pragmatic guide that emphasizes the necessary practical items and discussions necessary to plan, set up, orchestrate and debrief ECMO simulations for different types of learners in different Comprehensive Healthcare Simulation ECMO Simulation A Theoretical and Practical Guide is part of the Comprehensive Healthcare Simulation Series and this book is intended for educators, simulation technologists and providers involved in ECMO programs who recognize the value of simulation to improve ECMO outcomes. *Simulation Training on Extracorporeal Membrane Oxygenation* George Wing Yiu, 2016 Conventional extracorporeal membrane oxygenation ECMO training usually only consists of didactic lectures and water drill of ECMO circuit. However, learners cannot experience changes of clinical condition of patients. Simulation-based learning is a perfect answer to this by providing participants authentic interactive team-based training without risk to real patients. Hospital Authority HA of Hong Kong has implemented a corporate-wide ECMO simulation-based training program since 2014. It aims to provide a structural and standardized training opportunity for clinical staff members to gain hands-on experience in ECMO circuit management and troubleshooting technique. In the program, participants will go through three categories of scenarios: 1 replicate common real patient clinical experience, 2 replicate incident that only happens infrequently, and 3 imitate clinical situation that is rarely happened but life-threatening and where prompt and correct actions are necessary. Every scenario has its own debriefing session that covers technical and human factor issues. Since 2014, 32 identical full-day courses were conducted and 285 doctors and nurses were trained. All participants were satisfied with the training and expressed that the simulation was an effective model for ECMO training. The training met their need and they could apply what they learned in real-life practice. *Education Curriculum on Extracorporeal Membrane Oxygenation* Wai Ching Simon Sin, Pauline Yeung Ng, Chun Wai Wallace Ngai, Chi Keung Peter Lai, Wai Kit Ricky Chan, Yuen Tin Andy Mok, 2019 Continuing education is essential for the success and safety of an extracorporeal membrane oxygenation ECMO programme. However, it is challenging due to the intrinsic characteristic of ECMO, a complex high-risk low-volume clinical activity which requires teamwork, inter-professional communication, critical decision, and rapid response especially in emergency. Thus, simulation is a rapidly evolving teaching methodology in ECMO education to address those training needs that cannot be entirely addressed by traditional teaching modalities. The development of a simulation programme requires commitment on

resources for equipment environment setup and training of personnel Knowledge on ECMO management education science and debriefing technique forms the cornerstone of successful ECMO simulation facilitators and hence the simulation programme Currently researches have already shown that ECMO simulation can improve individual and team performance despite that its impact on patient outcome is still unknown In the future the role of simulation will increase importantly in multicentre research certifying specialists and credentialing if standardization of training curriculum can be achieved

Recommendations for Improvements in Extracorporeal Membrane Oxygenation (ECMO) Training at Aurora St. Luke's Medical Center Megan Justman, 2017 *Ecmo Specialist Training Manual* Billie Lou Short, 2009-12-01 **ECMO Retrieval Program Foundation** Anton Sabashnikov, Thorsten Wahlers, 2023-02-06 This book should represent a guideline for launching an extracorporeal membrane oxygenation ECMO program It describes in detail particularities and special features of planning setting up developing structuring and maintaining of ECMO support program for instable patients with the need of transportation from peripheral hospitals to an experienced ECMO centre for further treatment Authors have condensed both the current evidence and Guidelines on ECMO and eCPR support and have highlighted in detail the issue of planning setting up developing structuring and maintaining this program with the view to helping other centres launching this life saving service taking into account their experience in this important field of medicine In this context the main benefit of this book is the outstanding and particular aim to educate the reader in developing and maintaining a large spectrum ECMO program The volume richly illustrated and written by KOLs using an expository writing style to promote the readability will appeal to intensivists anesthesiologists and cardiologists as well as cardiac and thoracic surgeons and pneumologists A Characterization of ECMO Training Practices in Pediatric Fellowships Loren Farley, 2022 Objective To characterize current training practices across institutions and subspecialties that train pediatric fellows in ECMO Design Mixed methods analysis employing a 21 question survey of Pediatric Critical Care Medicine PCCM Neonatology and Pediatric Cardiology Program Directors PD and focus groups for fellow experiences Setting Extracorporeal membrane oxygenation ECMO is a potentially life saving modality for critically ill patients but its high risk low volume nature increases the risk of deployment Studies have found high variability and lack of standardization in approaches to training in adult programs but there are no similar published studies in pediatrics Interventions None Measurements Responses are summarized as frequencies and percentages and compared using a Fischer s exact test Results Of the 75 responses 31% response rate 45% represent NICU 43% PCCM and 12% Pediatric Cardiology Fellows are described as an observer in nearly 30% of programs most commonly in pediatric cardiology and NICU subspecialties More than 20% of PD s feel that fellows are not able to independently manage ECMO at the time of graduation and 55% feel there are gaps in ECMO education provided The most common barriers to education are few patients cannulated fellow time constraints and lack of simulation capabilities experience Didactics simulation and bootcamps are the most common teaching modalities with simulation used in 62 75% of respondents Forty

five percent of programs have no specific criteria to determine competency in ECMO Methods of competency determination most frequently cited are attendance of didactic lectures attendance of simulation exercises and passing a written exam Programs in which PD s felt fellows cannot independently manage ECMO were more commonly low volume with fellows described as observers and less likely to use simulation journal clubs and bootcamps Fellows agree that ECMO management is important but many do not feel confident in their skills to do so and want more supplemental education Conclusions Wide variability exists in fellow role frequency of training PD confidence in independent management and competence determination Standardization of ECMO training approaches through a longitudinal curriculum could improve fellow education Improvement in frequency of education autonomy and follow through with patients was identified by fellows as likely to be helpful to improve confidence and skills and these should be target moving forward **ECMO Specialist**

Extracorporeal Membrane Oxygenation Specialist Training Manual Krisa Van Meurs,Extracorporeal Life Support Organization,1999 *Worldwide Successful Pediatric Nurse-Led Models of Care* Cecily L. Betz,2023-01-31 This book provides readers with international exemplars of nurse led nurse directed pediatric models of care It offers innovative and forward thinking models of nursing care incentives and opportunities for nurses to replicate similar nurse led models of care in their own clinical and community based settings Readers will benefit from selected and proven nurse led nurse directed pediatric models of care that have been developed implemented and evaluated by advanced practice pediatric nurses including successful exemplars from less developed countries and underserved populations This book is a welcome addition to faculty in child health graduate programs and or clinicians in hospitals to have this kind of model for practice This book encompasses an extensive compilation of contributions of international authors also from countries that have been rarely featured in books and it facilitates worldwide linkages with colleagues internationally ECMO Extracorporeal Cardiopulmonary Support in Critical Care 5th Edition Elso,2017-02-01 Cardiothoracic Critical Care Natalia S. Ivascu,Brigid Flynn,Vivek K. Moitra,Alan Gaffney,2020 Practicing critical care entails understanding human physiology pharmacokinetics and molecular pathways in concert with adherence to evidence based literature Some may say combining all of these entities into practice creates the art of critical care medicine One strategy to gain proficiency in the practice of critical care medicine is to simulate what you would do in specific problem based scenarios That is the aim of this textbook aptly titled *What Do I Do Now* This text focuses on Cardiothoracic Critical Care and will cover guidelines for evidence based practice respiratory and metabolic physiology common hemodynamic perturbations ventricular failure and mechanical circulatory support devices All clinicians who care for cardiothoracic patients who are critically ill can find pearls of practice wisdom complemented by literature citations within this text So go ahead place yourself at the foot of the bed and try to think through *What Would I Do Now* when presented with each patient within these pages of your handheld cardiothoracic
